To whom it may concern,

RE: Ikhaya Automation Systems

IFS (International Facilities Services) is a leading facilities management business with an extensive footprint in Sub-Saharan Africa.

This regional knowledge, together with our practical experience in constructing and managing camps, has led to us being a preferred provider in the management and operations of large camps.

I manage the IFS group's technology and systems, and we have been working with Ikhaya for the past 3 years. Their product, which is a Real Time Monitoring System, conforms to our requirements of monitoring our walk-in fridges and freezers. We currently have approximately 10 devices installed into our facilities across Africa, and we are looking to extend this service to all appropriate sites in the future.

Dealing with Ikhaya is a pleasure and they meet all our pre-requisites for service delivery. Praba and his team are very knowledgeable and gladly assist whenever there is a question or query.

Yours sincerely,

Jonathan Lee
Finance & Technology Manager
International Facilities Services South Africa (Pty) Ltd
