Fresh & Ready Ltd® is the smart efficient answer to all grab & go, catering and box lunch needs. For over 19 years, Fresh & Ready Ltd has been manufacturing and distributing high-quality sandwiches, salads, wraps, entrees, box lunches, and much more.

In addition to what we make, we are concerned with how we make it. We have a comprehensive, detailed food safety program that gives us an extra level of confidence in the foods we manufacture.

We have been working with Ikhaya for more than 5 years; one thing that stands out is their support and willingness to assist. We have 15 units that are installed into our cold rooms and vehicles which provides end to end monitoring of our cold chain.

I am the owner of the business so having implemented a solution that Ikhaya provides allows me to sleep well at night knowing I will receive a sms alert in the event of my product being put at risk of being compromised. Being in the food industry, audits are frequent therefore having all the temperature records at my fingertips makes this process that much easier.

The system is very easy to use and self-explanatory; it also allows me to access my Temperature data via my mobile which is very useful on days when I am not at work or after hours and having the detailed daily & monthly report allows me to keep a birds' eye view on process quality.

I am very happy that we chose Ikhaya and we look forward to working with them in the far foreseeable future.

Yours Faithfully

Veeraj Eeram

Director

Fresh & Ready Ltd
